Are you ready for a billing service?

Maybe there is something in between doing your own billing and outsourcing it all. Billing Buddies created the perfect solution to a billing service. The provider office performs the tasks amenable to them. And, Billing Buddies does the rest; trains staff, setups Medisoft and electronic transactions, sends claims and statements, follows-up on unpaid receivables and backs-up and maintains the data. Plus, we assist the office in staying abreast of healthcare industry changes.

So, how does this all work? First, we either create or move your Medisoft data to a central online location. Next, we enroll your office to transmit and receive electronic transactions. Finally, we work together to develop office policies, expectations of work flow and we create a clinic profile for your office. This process all takes about a week. (Sometimes, government payers may take 2-4 weeks to approve electronic transactions, but in the meantime, we can get started.)

What is the cost of Billing Buddies? We charge a one-time setup fee of \$500 and then we have package deals. The first package starts at \$600 per month for up to \$10,000 in billed charges. Included in the package; we backup and maintain Medisoft, pay all fees associated with claims and statements, fees associated with hosting your data plus of course our staff fees to perform all the tasks. If your charges are higher than \$10,000 per month, we will perform a personalized cost analysis.
